

Understanding the data and consumers

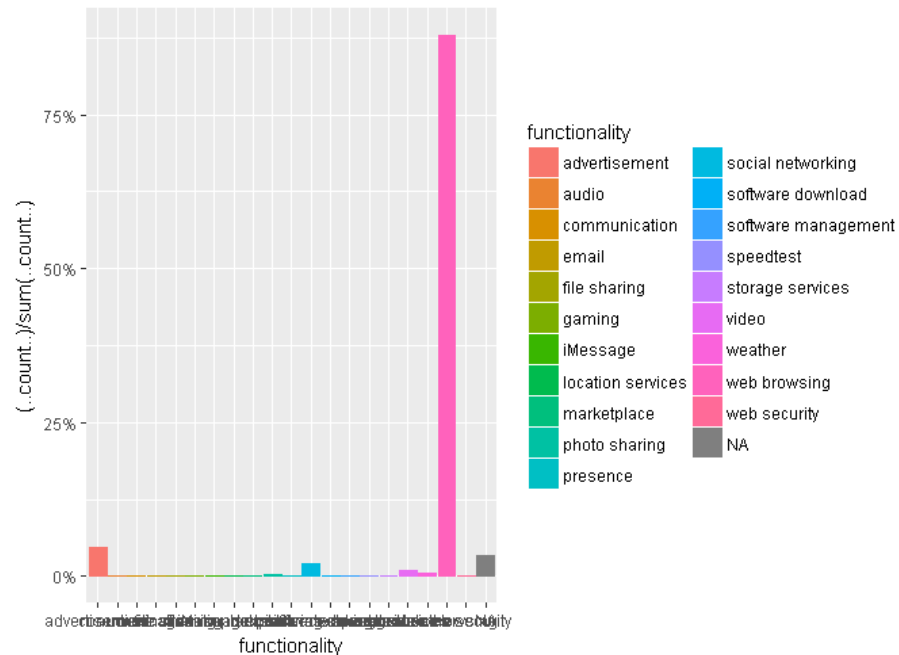

Nearly all the data is available for mobile phones

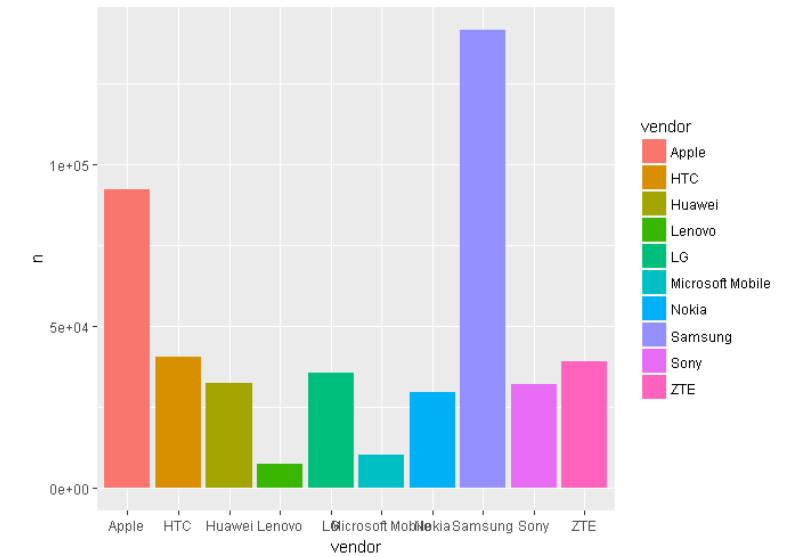

Android is the highly preferred OS across users in Croatia

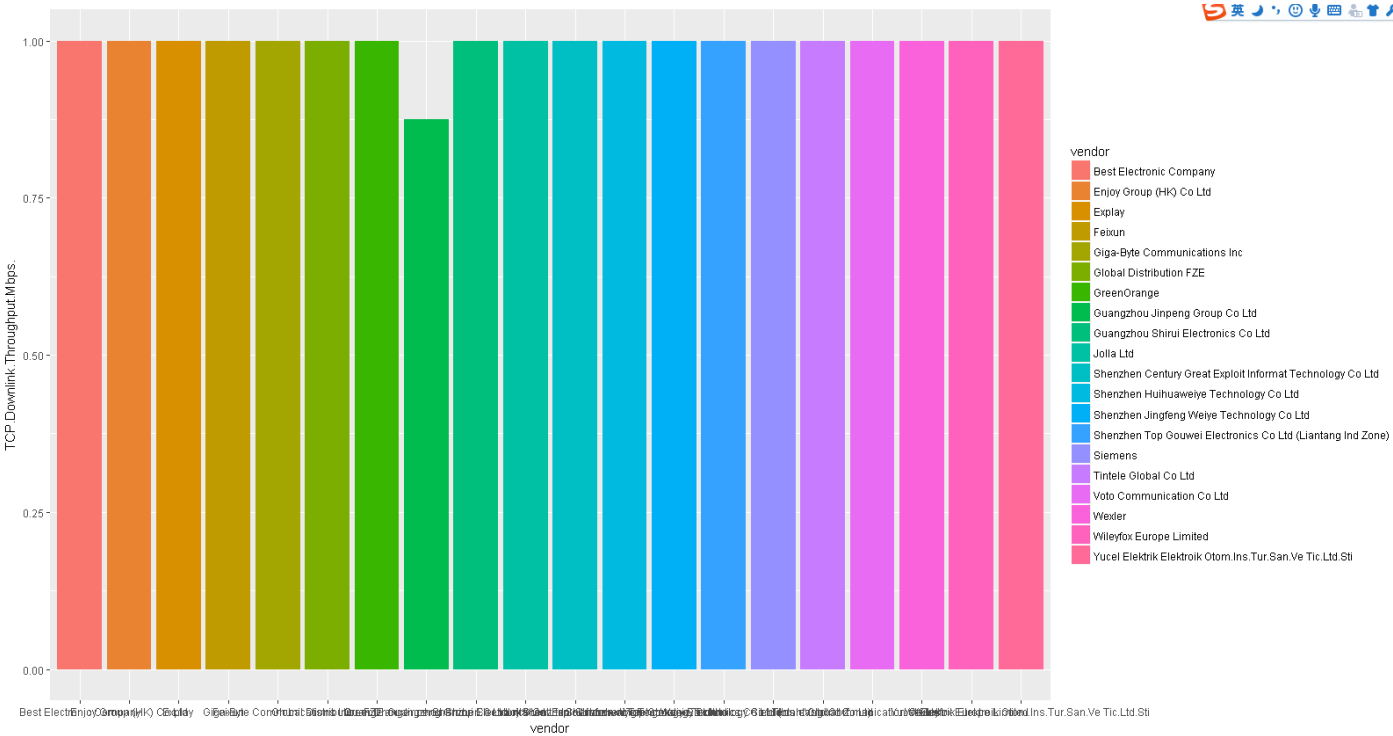

Use of cell phones majorly comprises web-browsing

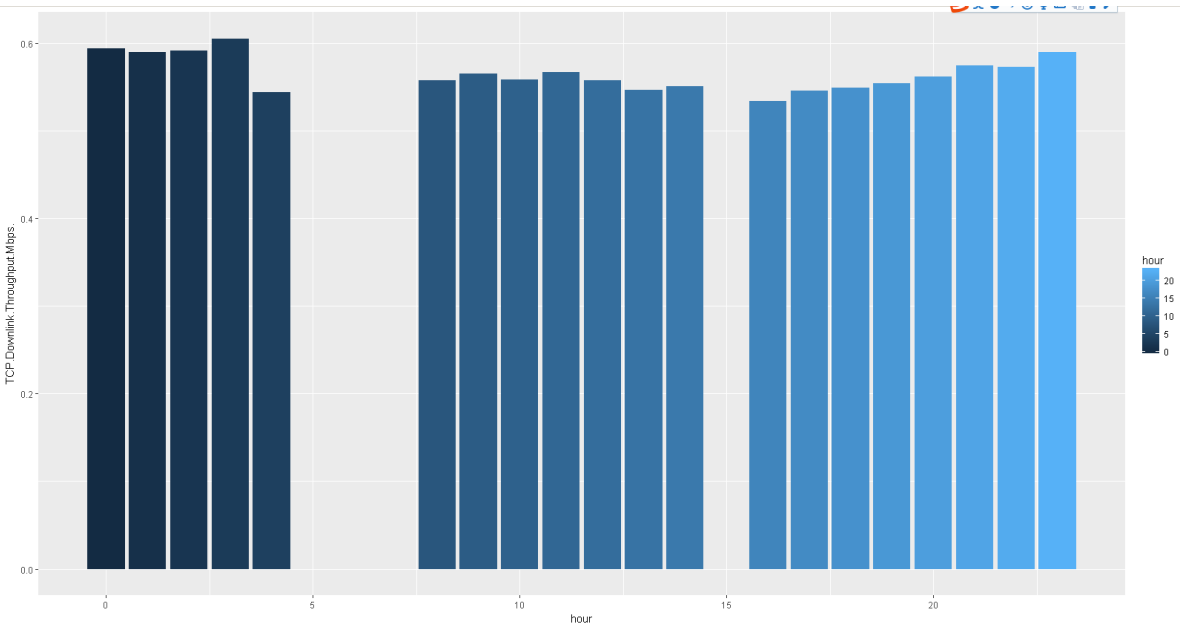

Samsung and Apple are the most preferred brands of cell phones

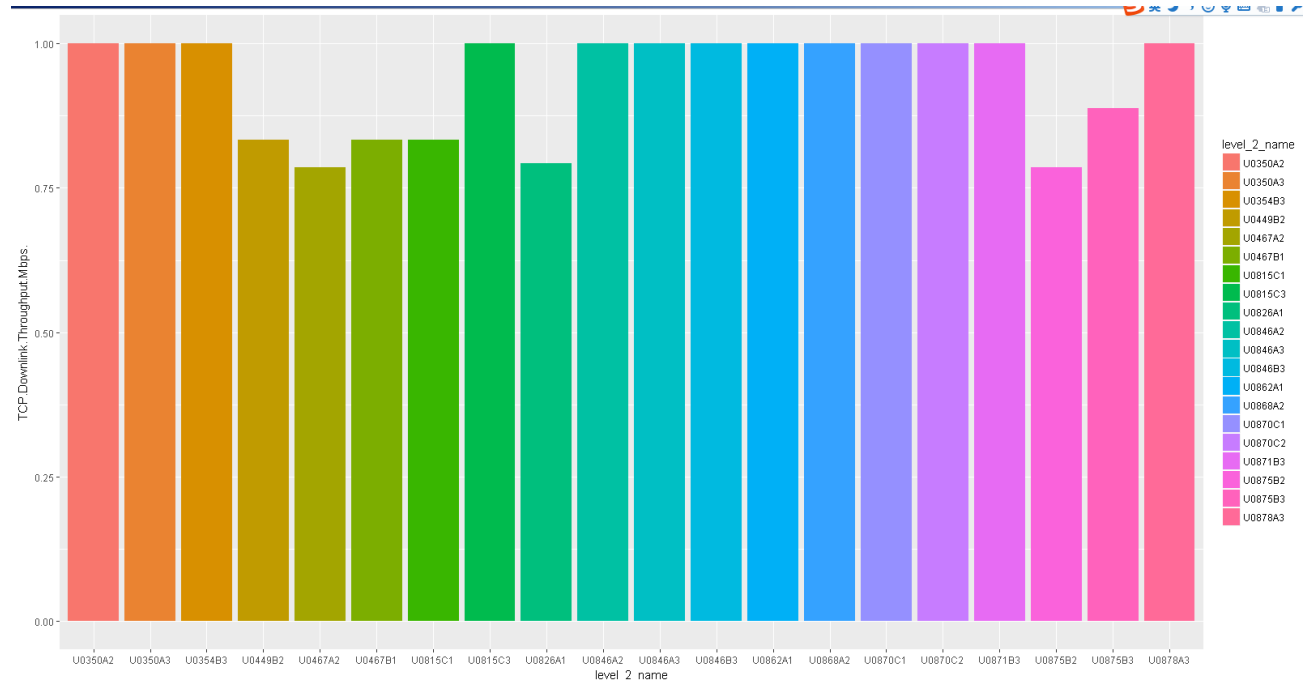

Throughput is not affected
By vendor.

Throughput is not affected
By hour, while when people
Go to work and go home,
There are not much download.

It seems that some server base may affect Download performance.

It turns out that functionality may correlate With Download performance
